

# Affluent Investor Snapshot 2024

A Global Quality of Life special report by HSBC

**HSBC**

| Opening up a world of opportunity

# Foreword

Everyone has goals and dreams. The path to achieve them is rarely straightforward. Planning, discipline, and perseverance are crucial, especially when it comes to the financial aspects of our lives. Investing should be an integral part of your financial journey. Today, it is easier than ever to plan for your future, and access investment solutions, information and advice, which is why more people are investing today and starting earlier.

Our Affluent Investor Snapshot 2024, a Global Quality of Life Special Report by HSBC, asks some simple yet important questions about investment behaviours worldwide.

To uncover answers, we surveyed over 11,000 affluent individuals across 11 markets, creating a comprehensive snapshot of today's affluent investor.

The insights presented in the following pages have been valuable in crafting our Wealth proposition and solutions for clients at various life stages, each with unique aspirations. I trust you will find these insights equally beneficial on your financial journey and in your pursuit of a higher quality of life.

**Jenny Wang**  
Global Head of Personal and Premier Wealth Solutions

# Key Findings

## Affluent investors maintain sizable cash allocations in their portfolios

Affluent investors currently allocate an average of 32% of their portfolios to cash, from 37% in the UK to 24% in India and Indonesia. Public equities and fixed income account for the second and third highest mean allocations, respectively.

## Affluent investors who plan to adjust their portfolios will invest 54% of their cash

39% of affluent investors intend to reoptimize their portfolios in the next 12 months, and they will invest 54% of their current cash holdings on average. Millennials will invest relatively more of their cash than older generations, as will those in mainland China, UK and US relative to other markets.

## Affluent investors pursue diversification across asset classes, product types and geographies

Affluent investors plan to add more alternative investments to their portfolios, particularly in private market funds and hedge funds. 34% of affluent investors in major international wealth centres intend to invest more internationally, with the US and mainland China being the top destinations.

## Millennials are embracing investing

Millennials not only begin investing at an earlier age, but they also allocate a greater portion of their income to it, with over 25% of their net monthly earnings committed to investments. Their portfolios are typically more diversified, both in terms of asset classes and investment instruments.

## Affluent investors seek guidance primarily from banks, insurance companies and financial advisers

Globally, 63% of affluent investors continue to look to the financial services sector for investment guidance. But alternative resources figure prominently, with business and financial websites (34%), and friends and family (33%) also ranking highly.

**HSBC** | Opening up a world of opportunity

Equities and fixed income are the biggest individual asset classes owned, after cash.

**Mean asset allocation by investable assets, generation**

**Mean asset allocation**

Others: Investment-linked insurance, passion assets, digital currencies

**Mean asset allocation by investable assets, generation**

Cash dominates affluent investors' portfolios, from 37% in the UK, to 24% in India and Indonesia.

## % of assets held in cash

### Asset allocation

### By investable assets

### By market

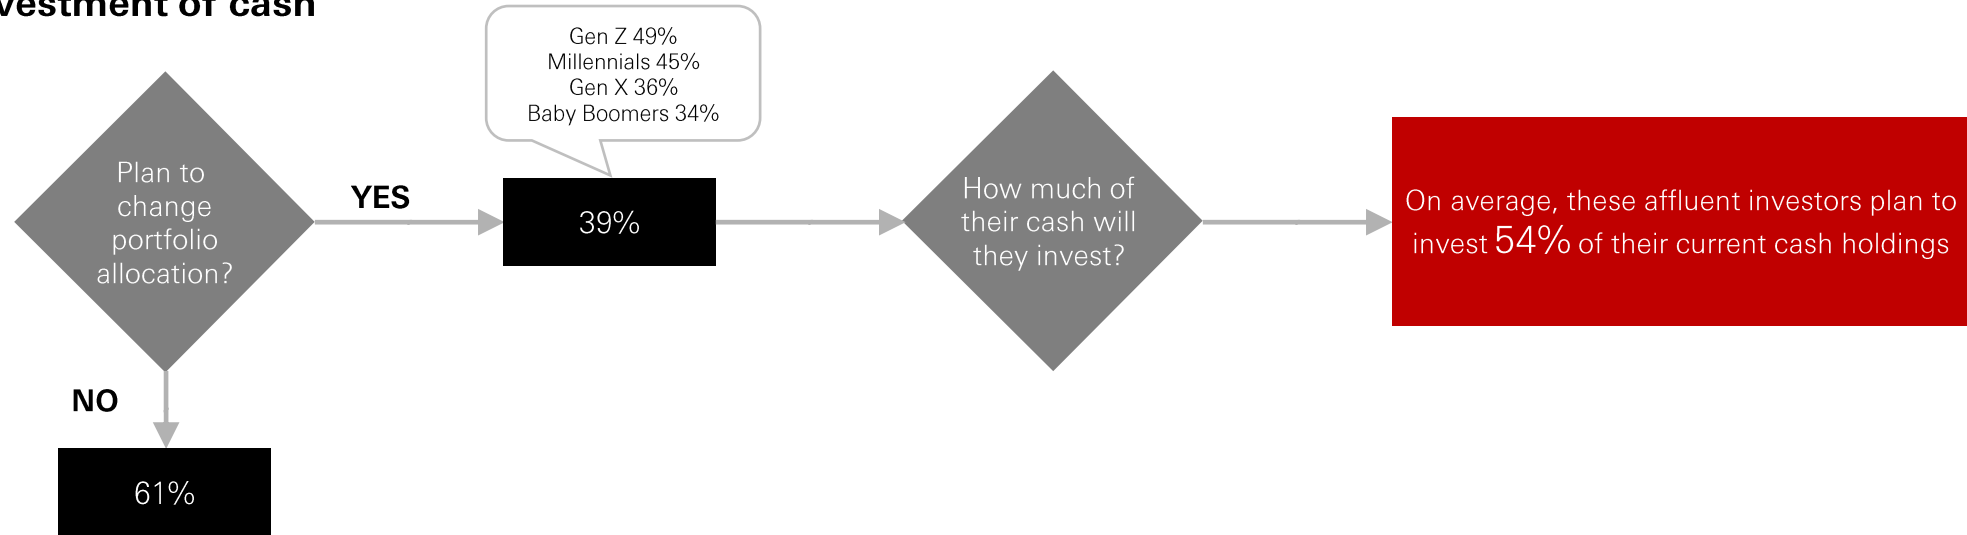

A8a. And approximately what is your current asset allocation for your overall portfolio? Base (unweighted): Affluent investors n=11,230. To find the full names of market abbreviations refer [here](#)

Affluent investors who plan to change their asset allocation will invest 54% of their current cash holdings.

**Intended investment of cash**

■ % of cash holdings investors plan to invest by sub-groups

Younger generations will invest a larger percentage of their cash holdings

CN, UK and US will invest most cash

Affluent investors with higher investable assets plan to invest more of their cash

A8a2. Do you plan to change the allocation of your assets in the next 12 months? A8b. In the next 12 months, what percentage of your assets do you plan to allocate to the following financial products?  
 Base (unweighted): Among those who plan to change assets allocation in the next 12 months n=4434

02

# Diversification trends

Affluent investors own an average of 4 asset classes. Asset class diversification increases by investable assets.

### Asset class diversification

#### Average number of asset classes\*

■ Currently investing in ■ Plan to invest in the next 12 months

#### By generation

#### By investable assets

### Barriers to diversification

<p><b>1</b></p> <p><b>45%</b></p> <p>Uncertainty about market conditions &amp; trends</p>	<p><b>2</b></p> <p><b>36%</b></p> <p>Concerns about increased complexity &amp; portfolio maintenance</p>	<p><b>3</b></p> <p><b>35%</b></p> <p>Lack of knowledge/ understanding</p>	<p><b>4</b></p> <p><b>32%</b></p> <p>Difficulty in monitoring &amp; managing a diversified portfolio</p>	<p><b>5</b></p> <p><b>32%</b></p> <p>Time constraints for conducting thorough research</p>	<p><b>6</b></p> <p><b>32%</b></p> <p>Lack of trusted professional advice or guidance</p>
---	--	---	--	--	--

\*The average asset classes owned calculation includes 6 asset classes - Cash holdings, Equities, Fixed income/ bonds, Real estate, Alternatives, Others (e.g. Investment-linked/ savings-oriented insurance, Passion assets, Digital currencies). However, Structured products/ derivatives are not counted as an asset class in this calculation.

A8a. And approximately what is your current asset allocation for your overall portfolio? A8b. In the next 12 months, what percentage of your assets do you plan to allocate to the following financial products? A8j. What are the main challenges you face when trying to diversify your investment portfolio? Base (unweighted): Base (unweighted): Affluent investors n=11,230.

On average, affluent investors hold 4.3 types of financial products, with plans to increase this to 5 over the next 12 months. Affluent Millennials and individuals with higher investable assets tend to own a greater variety of product types.

## Product types diversification

### Average number of product types\*

### By generation

### By investable assets

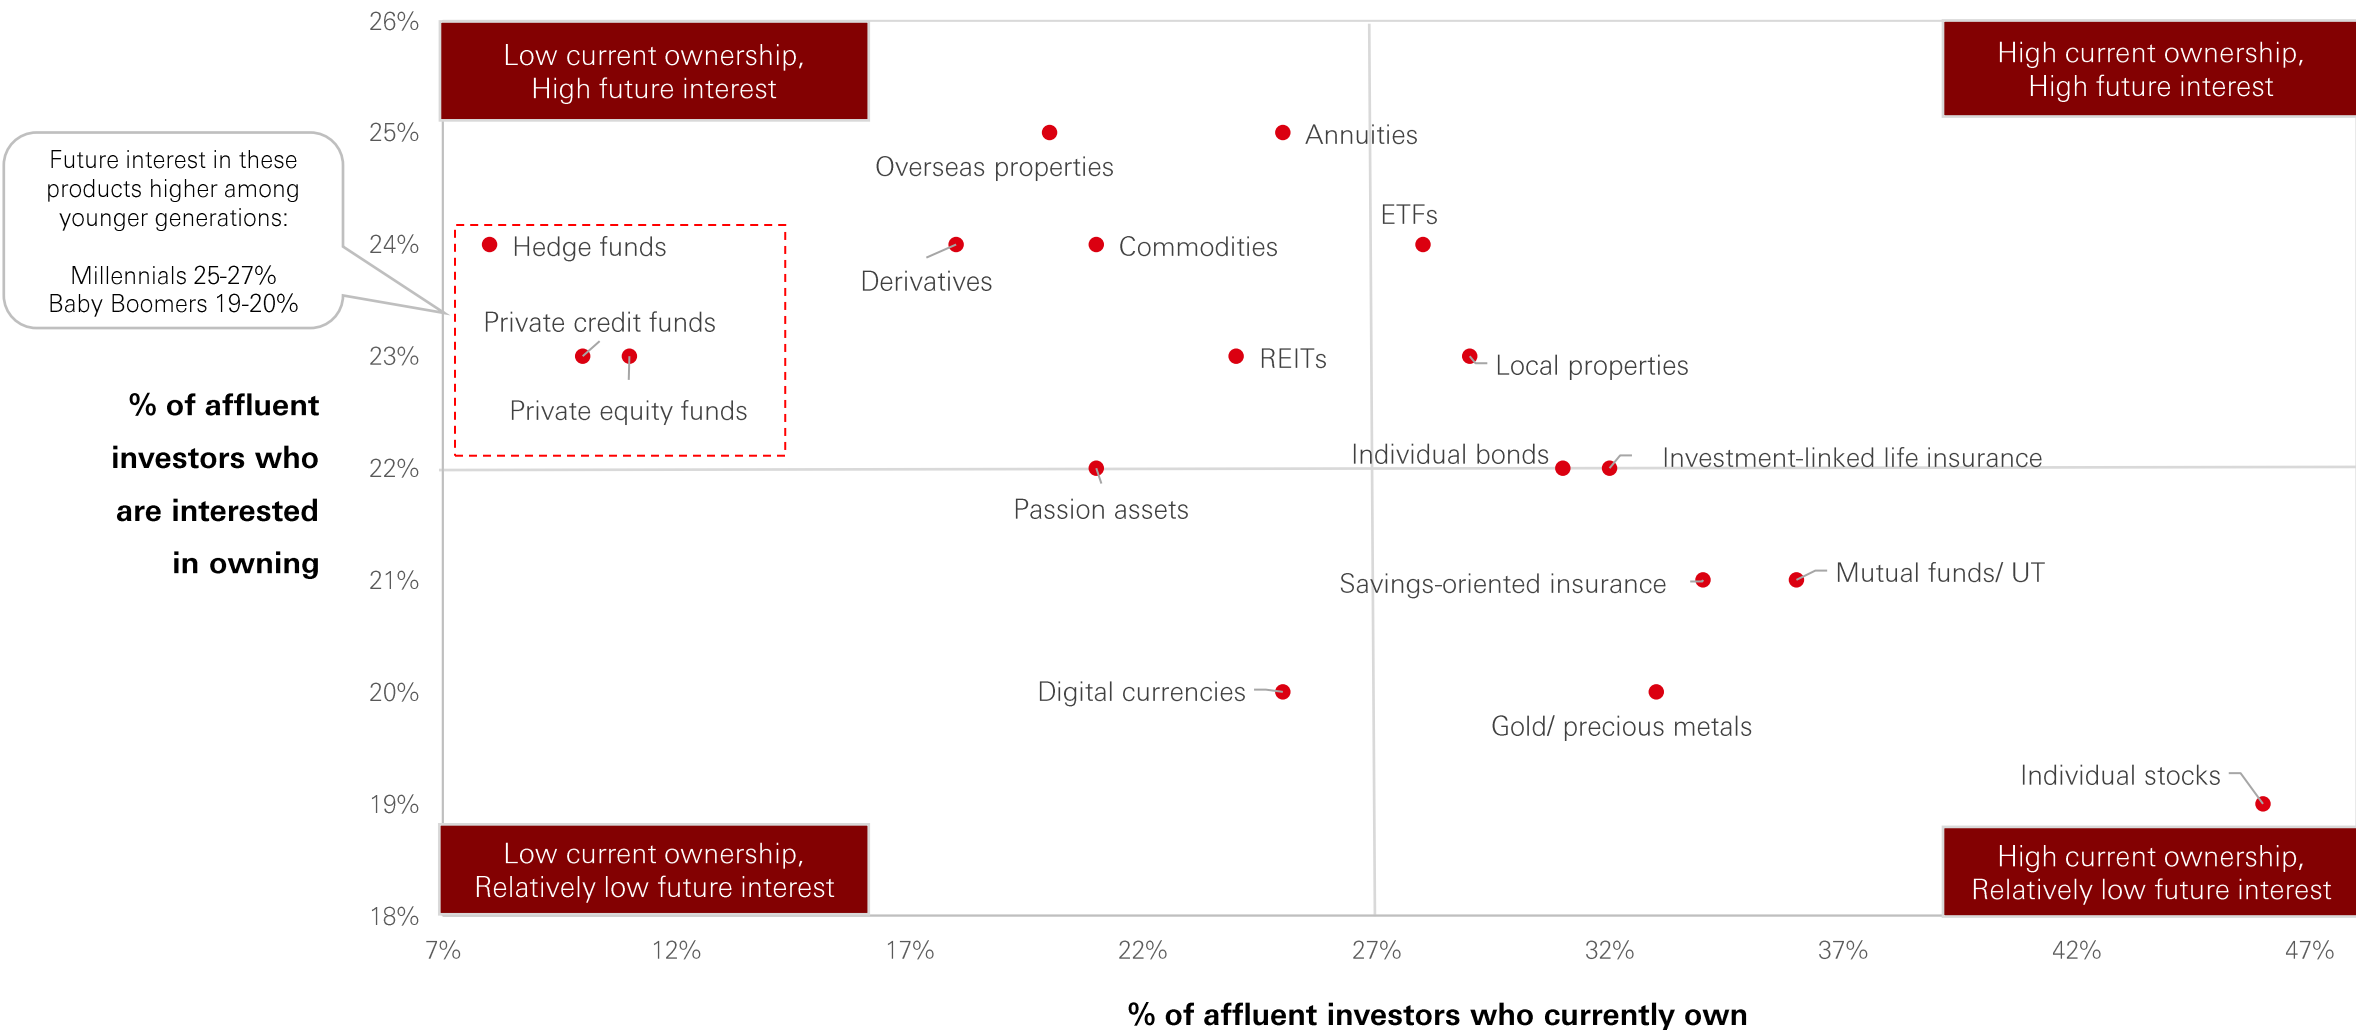

\*The average product types owned calculation includes 11 product types - Equities, Fixed income/ bonds, Private equity funds/ Private credit funds/ Hedge funds, Real estate, Gold/ precious metals, Commodities, Digital currencies, Passion assets, Structured Products/ derivatives, REITs and Others (such as Investment-linked/ savings-oriented insurance). Cash holdings are excluded.

A8 . Then, which of these savings and investment products do you currently have or plan to have in the next 1-3 years? Base (unweighted): Affluent investors n=11,230.

Despite low current ownership, affluent investors show relatively high interest in Alternatives such as hedge funds and private market funds.

**Investment products owned vs. intent to own**

A8. Then, which of these savings and investment products do you currently have or plan to have in the next 1-3 years? Base (unweighted): Affluent investors n=11,230.

Home market bias remains prevalent among affluent investors in international wealth centres.

## Geographical diversification (equities)

% of affluent investors currently investing in equities in home market vs. the US

34% of affluent investors in major international wealth centres say they plan to increase their investment exposure to other geographies.

### Plan to increase investments in other geographies (across all asset classes)

	Total	HK	SG	UAE	UK	US
<b>% of affluent investors who plan to increase investments in other geographies</b>						
	34%	42%	25%	55%	24%	22%
<b>Top markets where affluent investors plan to increase investments</b>						
1	US	US	US	US	US	UK, CA
2	CN	CN	CN	CA	CA	JP
3	UK	UK, JP	MY	IN, KSA	DE, JP	FR, CN
4	CA	CA	AU, JP	UK, CN	AU	IN
5	JP	SG	IN, HK	EG	FR, CN	DE, IT

A8e3. Do you plan to increase your investments in any specific markets? If yes, which markets?  
Base (unweighted): Affluent investors in HK n=1702, SG n=550, UAE n=523, UK n=1947, US n=1036

On average, affluent investors have at least two investment themes in their portfolios. Renewable Energy & Clean Technologies and AI & Automation are the most popular.

**Top themes invested in – equities/ bonds/ similar investments**  
 (% of affluent investors investing in each theme)

Affluent Millennials (34%) are more interested than Baby Boomers (25%)

**Top markets interested in thematic investing:**

	India	Indonesia	Malaysia
1	E-commerce and Digital Payment	E-commerce and Digital Payment	E-commerce and Digital Payment

3	Healthcare and Biotechnology	Infrastructure Development	Artificial Intelligence and Automation

**Average no. of themes invested in (by investable assets):**

USD 100K-250K	USD 250K-500K	USD 500K -1M	USD 1M-2M
2.5	2.8	3.0	3.0

Higher wealth tiers are more likely to invest in secular themes

A8g. Then, which of the following themes are you currently investing in?  
 Base (unweighted): Affluent investors n=11,230.

03

# Generational wealth management

HSBC

| Opening up a world of opportunity

Financial goals vary by generation, from supporting the family and gaining wealth to education savings and planning for retirement. Insurance coverage is a top 5 goal for all except Gen Z. Generating passive income is a goal for Gen X and Gen Z.

### Top financial goals

#### % of affluent investors who hold each financial goal - overall

#### Top 5 financial goals - by generations

	Gen Z (Age 25-27)	Millennials (Age 28-43)	Gen X (Age 44-59)	Baby Boomers (Age 60-69)
1	Supporting family financially 47%	Gain wealth for financial security 42%	Planning for retirement 48%	Gain wealth for financial security 49%
2	Gain wealth for financial security 43%	Education savings for child/ren 40%	Gain wealth for financial security 47%	Planning for retirement 48%
3	For additional/multiple income streams 41%	Planning for retirement 39%	Supporting family financially 39%	For vacation/leisure 45%
4	Planning for retirement 36%	Supporting family financially 38%	For additional/multiple income streams 37%	Having enough insurance coverage 41%
5	Investing in properties 36%	Having enough insurance coverage 37%	Having enough insurance coverage 37%	To fight against inflation 41%

A1. Currently, what are your top 5 financial goals? Base (unweighted): Affluent investors n=11,230.

Younger generations start investing earlier in life, with a higher proportion of their income going towards investing.

## Investment behaviour (by generation)

Average age when started investing

Average % of monthly net income put towards investing

Younger generations think they need less money to start investing and they are more engaged as investors.

## Investment behaviour (by generation)

Perceived minimum amount needed to start investing (USD)  
*median*

Average frequency of investing & monitoring investment (per month)

AU2.1. Thinking of investing in general, what is the minimum amount do you think is needed to start investing? AU2.2. Which of the following best describes how frequently you typically make investments? AU2.3. How often do you typically monitor or track your investments (e.g. checking investment performance, updates, tracking company news, etc.)? Base (unweighted): Affluent investors n=11,230.

Banks, insurance companies and financial advisers are the main sources of investment guidance.

## Sources of wealth management guidance (% of affluent investors relying on each source)

# Research background & methodology

The Affluent Investor Snapshot 2024, a Global Quality of Life special report by HSBC, delves into the investment portfolios, behaviours, and priorities of affluent individuals worldwide. Conducted in March 2024 through an online survey across 11 markets, this research captures insights from 11,230 affluent investors aged 25 to 69, each possessing investable assets ranging from USD 100,000 to USD 2 million.

HSBC launched the inaugural edition of the Quality of Life Report in 2023 to explore the concept of a good Quality of Life across different generations of affluent individuals and investigate the relationship between physical and mental wellness, and financial fitness. The research sheds light on life objectives, the role of financial planning and preparedness, and the evolving nature of retirement. The forthcoming Quality of Life Report 2024 continues to expand upon these themes into several new areas, including investment attitude, wealth management behaviour, portfolio diversification, international education needs and legacy planning.

The study was conducted by Intuit Research.

## Total sample size

n=11,575

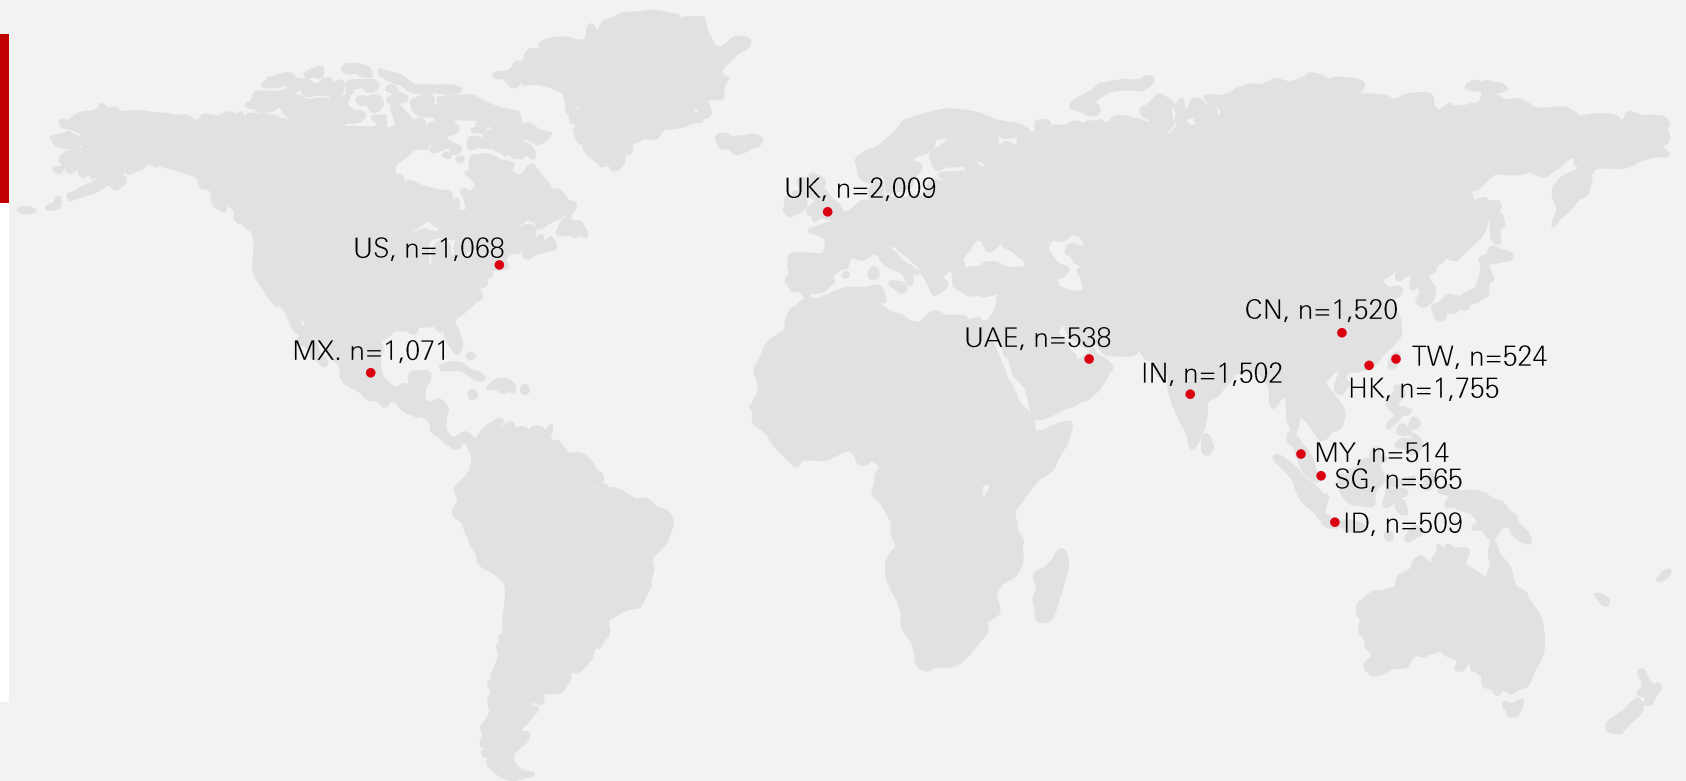

Fieldwork: 4-20 March 2024

## Respondent criteria:

Individual portfolios managed by HSBC Asset Management primarily reflect individual clients' objectives, risk preferences, time horizon, and market liquidity.**

The value of investments and the income from them can go down as well as up and investors may not get back the amount originally invested. Past performance contained in this document or video is not a reliable indicator of future performance whilst any forecasts, projections and simulations contained herein should not be relied upon as an indication of future results. Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up. Investments in emerging markets are by their nature higher risk and potentially more volatile than those inherent in some established markets. Economies in emerging markets generally are heavily dependent upon international trade and, accordingly, have been and may continue to be affected adversely by trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade. These economies also have been and may continue to be affected adversely by economic conditions in the countries in which they trade. Investments are subject to market risks, read all investment related documents carefully.

This document or video provides a high-level overview of the recent economic environment and has been prepared for information purposes only. The views presented are those of HBAP and are based on HBAP's global views and may not necessarily align with the Distributors' local views. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and is not subject to any prohibition on dealing ahead of its dissemination. It is not intended to provide and should not be relied on for accounting, legal or tax advice. Before you make any investment decision, you may wish to consult an independent financial adviser. In the event that you choose not to seek advice from a financial adviser, you should carefully consider whether the investment product is suitable for you. You are advised to obtain appropriate professional advice where necessary.

The accuracy and/or completeness of any third-party information obtained from sources which we believe to be reliable might have not been independently verified, hence Customer must seek from several sources prior to making investment decision.

## **Important information on ESG and sustainable investing**

In broad terms “ESG and sustainable investing” products include investment approaches or instruments which consider environmental, social, governance and/or other sustainability factors to varying degrees. Certain instruments we classify as sustainable may be in the process of changing to deliver sustainability outcomes. There is no guarantee that ESG and Sustainable investing products will produce returns similar to those which don’t consider these factors. ESG and Sustainable investing products may diverge from traditional market benchmarks. In addition, there is no standard definition of, or measurement criteria for, ESG and Sustainable investing or the impact of ESG and Sustainable investing products. ESG and Sustainable investing and related impact measurement criteria are (a) highly subjective and (b) may vary significantly across and within sectors.

HSBC may rely on measurement criteria devised and reported by third party providers or issuers. HSBC does not always conduct its own specific due diligence in relation to measurement criteria. There is no guarantee: (a) that the nature of the ESG / sustainability impact or measurement criteria of an investment will be aligned with any particular investor’s sustainability goals; or (b) that the stated level or target level of ESG / sustainability impact will be achieved. ESG and Sustainable investing is an evolving area and new regulations are being developed which will affect how investments can be categorised or labelled. An investment which is considered to fulfil sustainable criteria today may not meet those criteria at some point in the future.
